

**SCHOOL OF ENVIRONMENTAL AND EARTH  
SCIENCES**

**B (2.88)**  
NAAC RE-ACCREDITED

**NORTH MAHARASHTRA UNIVERSITY,  
JALGAON**

**REVISED SYLLABUS**

**(With CGPA System)**

**FOR**

**M. SC. APPLIED GEOLOGY**

**w.e.f.**

**JUNE, 2013**

**SCHOOL OF ENVIRONMENTAL and EARTH SCIENCES**

**North Maharashtra University, Jalgaon**

**M. Sc. (Applied Geology)**

**Semester I**

- GS 101: Mineralogy and Crystallography.  
GS 102: Principles of Stratigraphy and Palaeontology  
GS 103: Sedimentology  
GS 104: Practicals on Mineralogy, Crystallography and Paleontology  
GS 105: Practicals on Sedimentology  
GS 106: Tutorial 1

**Semester II**

- GS 201: Igneous and Metamorphic Petrology  
GS 202: Physics and Chemistry of the Earth.  
GS 203: Geomorphology, Structural Geology and Tectonics  
GS 204: Practicals related to Igneous and Metamorphic Petrology  
GS 205: Practicals related to Geomorphology, Structural and Tectonics  
GS 206: Tutorial 2

**Semester III**

- GS 301: Indian Stratigraphy.  
GS 302: Indian mineral deposits, exploration and mining  
GS 303: Remote sensing and GIS  
GS 304: Practicals related to above courses.  
GS 305: Practicals related to above courses.  
GS 306: Seminar 1

**Semester IV**

- GS 401: Petroleum geosciences.  
GS 402: Hydrogeology  
GS 403: Engineering and environmental geosciences.  
GS 404: Practicals related to above courses  
GS405: Dissertation

GS 406: Seminar 2

**Note:** Industrial training/Geological field mapping/allotted geological project work/ Dissertation is compulsory for M. Sc. (Applied Geology) students.

**SCHOOL OF ENVIRONMENTAL AND EARTH SCIENCES**  
**North Maharashtra University, Jalgaon**  
**COURSE STRUCTURE WITH CREDIT**  
**M.Sc. (Applied Geology)**

	<b>Course</b>	<b>Marks</b>	<b>Hrs./Wee k</b>	<b>Credit</b>	<b>Total</b>

**SEMESTER - I**

**GS-101: MINERALOGY AND CRISTALLOGRAPHY**

**Unit – I: Mineral Optics and Introduction to Instruments**

1. Isotropic and anisotropic substances; Reflection, refraction and refractive index; Relief, birefringence and Becke line effect; Optically uniaxial and biaxial minerals; Determination of optic sign of uniaxial and biaxial minerals; interference figures; Pleochroism and determination of pleochroic scheme in minerals
2. X-ray crystallography and Bragg's equation; Application of X-ray diffraction spectrometry in mineral characterization
3. Application of following techniques in mineralogy: Differential Thermal Analysis (DTA), Thermogravimetric Analysis (TGA), Scanning Electron Microscope (SEM), Transmission Electron Microscope (TEM) and Electron Probe Micro Analyser (EPMA)
4. Application of thermal, magnetic and radioactive properties of minerals.

**Unit – II: Introduction to Mineralogy and Study of Non-Silicates**

1. Principle of crystal structure; Bonding in minerals; Coordination and co-ordination numbers; Silicate structures and structural formula; Isomorphism and solid solution; Types of ionic substitution; Polymorphism and types of polymorphic transformations and Pseudomorphism Conversions of oxide and element weight percentages; Calculation of mineral formulae.
2. A detailed study of Non-silicates mineral groups with reference to their general formulae, classification, atomic structure, chemistry, experimental work and paragenesis.
3. Non-silicates: Carbonates- Calcite Group, Aragonite Group, Dolomite Group; Phosphates- Apatite, Monazite; Sulphates- Gypsum, Anhydrite, Barite, Alunite Group; Halides- Halite, Sylvite, Fluorite; Nitrates- Trona, Soda niter; Oxides and Hydroxides- Spinel Group, Hematite Group, Rutile Group, Bauxite Group, Periclase.

**Unit – III: Mineralogy of Silicates**

1. A detailed study of Silicate mineral groups with reference to their general formulae, classification, atomic structure, chemistry, experimental work and paragenesis.
2. Silicates: Nesosilicates- Olivine Group, Garnet Group and Aluminosilicate Group; Sorosilicates- Epidote Group, Scapolite Group; Cyclosilicates- Beryl, Tourmaline; Inosilicates- Pyroxene Group, Amphibole Group; Phyllosilicate- Mica Group, Chlorite Group, Serpentine Group, Pyrophyllite, Talc; Tectosilicates- Quartz, Feldspars, Feldspathoids and zeolite Group.

#### **Unit – IV: Crystallography**

1. Crystals, crystalline solids and their formation; Ordered patterns, nets and lattices; Symmetry in crystals; Axial ratio, indices, lettering and order of the crystallographic axes; Crystallographic notation (Weiss and Miller indices and convention in notation).
2. Classification of crystals, introduction to 32 classes of symmetry; The crystal systems and symmetry types; Stereographic representation of crystal symmetry and their uses; Imperfection of crystals and crystal defects; Twinning- causes, effects and genetic types.

#### **Unit – V: Gemology**

1. Physical properties, Optical properties and Chemical properties of inorganic gems like Diamond, corundum, beryl, chrysoberyl, garnet, spinel, topaz, tourmaline, zircon, peridot, jadeite, nephrite, opal, quartz, chalcedony, orthoclase, moonstone, labradorite, lapis lazuli, apatite, cordierite, zoisite, malachite, bowenite, denburite, diopside, enstatite, serpentine, steatite, natural glasses (obsidian and moldavite).
2. Study of Organic gems like Pearl, corals etc., their formation, structure and identification.
3. Introduction to instruments used in the study of gems.

- ❖ Hota, R.N. (2011) Practical Approach to Crystallography and Mineralogy, CBS Publisher and Distributors Pvt Ltd., New Delhi.

## **GS-102: PRINCIPLES OF STRATIGRAPHY AND PALAEOLOGY**

### **Unit – I: History and development**

1. History and development of Stratigraphy
2. Stratigraphic procedures (Surface and Subsurface)
3. Concept of Litho-facies and Bio-facies

### **Unit – II: Stratigraphic Correlation**

1. Stratigraphic Correlation (Litho-, Bio- and Chrono-stratigraphic Correlation)
2. Study of standard stratigraphic code (Lithostratigraphic, Biostratigraphic and Chronostratigraphic)
3. Concepts of Magnetostratigraphy, Chemostratigraphy, Event stratigraphy, and Sequence stratigraphy
4. Techniques in Palaeontology - megafossils - microfossils - nannofossils - ichnofossils - collection, reformation and illustration - binomial nomenclature

### **Unit – III: Invertebrate Paleontology**

1. Invertebrate Paleontology - A brief study of morphology, classification, evolutionary trends and distribution of Molluscs i.e. Bivalves, Gastropods and Cephalopods.
2. study of morphology, classification, evolutionary trends and distribution of Trilobites, Graptolites, Echinoids, Corals and Brachiopods.

### **Unit – IV: Vertebrate Paleontology**

1. Vertebrate Paleontology - Study of vertebrate life through Geologic time scale.
2. Study of reptiles, birds, fishes and mammals.

### **Unit – V: Paleontological perspective**

1. Introduction to Micropaleontology, Types of Microfossils, Paleopalynology
2. Foraminifera and Ostracods
3. Plants of Gondwana Period.
4. Paleontological perspective : Use of paleontological data in  
a) Stratigraphy    b) Paleo-ecology    c) Paleogeography

### **Books Recommended**

- ❖ Boardman, R.S., Cheethan, A.M. and Rowell, A.J. (1988) Fossil Invertebrates, Blackwell.

- ❖ Clarksons, E.N.K. (1998) *Invertebrate Paleontology and Evolution*, Allen and Unwin, London.

- ❖ Mayr, E. (1971) *Population, Species and Evolution*, Harvard.
- ❖ Prothero, D.R. (2004) *Bringing Fossil to Life – An Introduction to Paleontology* (2nd Ed.), McGraw Hill.
- ❖ Raup, D.M. and Stanley, S.M. (1985) *Principles of Paleontology*, CBS Publishers, New Delhi.
- ❖ Smith, A.B. (1994) *Systematics and Fossil Record – Documenting Evolutionary Patterns*, Blackwell.
- ❖ Stearn, C.W. and Carroll, R.L. (1989) *Paleontology – the record of life*, John Wiley.

## **GS-103: SEDIMENTOLOGY**

### **Unit – I: Field procedures**

- 1 Field procedures in Sedimentary Petrology
- 2 Geologic cycle
- 3 Sedimentary textures (Granulometric analysis, shape and roundness studies, surface textures)
- 4 Heavy mineral and Insoluble residue analysis

### **Unit – II: Petrography**

- 1 Petrography of rocks of clastic, chemical and biochemical origin (Conglomerates, Sandstone, Mudstone, Limestone and Dolomite)
- 2 Evaporite, Phosphorite, Chert, Iron and Manganese rich sediments
- 3 Volcanogenic sedimentary rocks

### **Unit – III: Clastic transport and fluid flow**

1. Clastic transport and fluid flow (fluid flow in theory and in nature, Reynold's Numbers, Froude Number, Sediment lift, transport, deposition, sedimentary gravity flow)

### **Unit – IV: Sedimentary structures**

1. Sedimentary structures (Physical structures, Biogenic sedimentary structures, Diagenetic structures).
2. Sedimentary Textures.

### **Unit – V: Sedimentation and Tectonics**

1. Concept of Sedimentary facies association models (Marine, Nonmarine, and Mixed Depositional Environment)
2. Sedimentation and Tectonics
3. Paleocurrents and Basin Analysis.

### **Books Recommended**

- ❖ Blatt, H., Middleton, G.V. and Murray, R.C. (1980) Origin of Sedimentary Rocks, Prentice-Hall Inc.
- ❖ Collins, J.D. and Thompson, D.B. (1982) Sedimentary Structures, George Allen and Unwin, London.
- ❖ Lindholm, R.C. (1987) A Practical Approach to Sedimentology, Allen and Unwin, London.
- ❖ Miall, A.D. (2000) Principles of Basin Analysis, Springer-Verlag.
- ❖ Pettijohn, F.J. (1975) Sedimentary Rocks (3rd Ed.), Harper and Row Publ., New Delhi.
- ❖ Reading, H.G. (1997) Sedimentary Environments and facies, Blackwell Scientific Publication.
- ❖ Reineck, H.E. and Singh, I.B. (1973) Depositional Sedimentary Environments, Springer-Verlag.
- ❖ Selley, R.C. (2000) Applied Sedimentology, Academic Press.
- ❖ Tucker, M.E. (1981) Sedimentary Petrology: An Introduction, Wiley and Sons, New York.
- ❖ Tucker, M.E. (1990) Carbonate Sedimentology, Blackwell Scientific Publication.
- ❖ Hota, R.N. (2011) Practical Approach to Petrology, CBS Publisher and Distributors Pvt Ltd., New Delhi

## **GS-104: PRACTICALS ON MINERALOGY, CRYSTALLOGRAPHY AND PALEONTOLOGY**

1. Study of interference figures - determination of optical sign of minerals, determination of  $2V$  and  $2E$ , determination of composition of plagioclase feldspars - determination of birefringence of minerals - Scheme of pleochroism
2. Construction of Stereograms and Gnomonograms - measurement of interfacial angle with contact goniometer - study of X-ray diffractograms
3. Study of rock forming minerals in thin sections
4. Study of rock forming minerals in hand specimens
5. Construction of rank charts for lithostratigraphy, biostratigraphy and chronostratigraphy
6. Construction of graphical logs from text descriptions
7. Exercises in correlation from given data or logs
8. Study of palaeontological technique related to megafossils.
9. Study of morphology of Bivalves, Gastropods Echinoids, Brachiopods
10. Separation, Processing, wet sieve analysis, preparation of slides of microfossils.
11. Morphology and morphological descriptions of planktonic and benthonic foraminifera, ostracodes.

## **GS-105: PRACTICALS ON SEDIMENTOLOGY**

1. Size Analysis (Procedures, Cumulative curve, Histogram, Visher's curve and Statistical calculation)
2. Shape analysis (Calculation and Classification)
3. Heavy mineral analysis (Procedure and identification)
4. Insoluble residue analysis (Procedure and identification)
5. Megascopic and studies of conglomerate and breccia
6. Megascopic and microscopic study of sandstone
7. Megascopic and microscopic study of limestone
8. Sedimentary structure (identification and classification)
9. Paleocurrent and basin analysis calculation

## **SEMESTER – II**

### **GS-201: IGNEOUS PETROLOGY AND METAMORPHIC PETROLOGY**

#### **Unit – I: Igneous Petrology**

1. Magma- its nature and composition. Factors controlling evolution of magma
2. Classification of Igneous rocks - historic perspective and the IUGS systematic
3. Introduction to mantle petrology mantle metasomatism and mantle heterogeneities;
4. Magmatism in relation to plate tectonics
5. Chemical characteristics of igneous rocks in the following tectonic setting: Mid Oceanic Ridge, Island Arcs, Oceanic plateaus, Continental Margins, Continental Rifts and Continental intraplates; Plume magmatism and hot spots; Large igneous provinces, mafic dyke swarms and layered complexes.

#### **Unit – II: Igneous Petrology**

1. Mantle melting: Partial melting (batch and fractional melting); Crystal fractionation (equilibrium and fractional (Rayleigh) crystallization); Contamination (AFC process) and dynamic melting.
2. Crystallisation of magma, fractional crystallization and differentiation, liquid immiscibility and assimilation. Influence of volatiles and role of oxygen fugacity in magmatic crystallizations.
3. Phase equilibrium studies - binary systems, ternary systems and their relations to magma genesis and crystallization in the light of modern experimental works.

#### **Unit – III: Igneous Petrology**

1. Textures and structures of igneous rocks; Petrography and Interpretation of igneous textures in terms of rate of nucleation and crystal growth.
2. Major, Trace and Rare Earth Element systematics in igneous rocks
3. Silica/alumina saturation, variation diagrams (Harker, AFM and TAS diagrams) their applications and limitations; Mg Number, Alteration Index, Saturation Index and other geochemical parameters.
4. Fractional crystallization, liquid lines of descent and lever rule.
5. Indian Igneous Rocks and their genesis

#### **Unit – IV: Metamorphic Petrology**

1. Types of metamorphism and their controlling factors
2. Grades of Metamorphism

3. Common minerals of metamorphic rocks
4. Metamorphic Texture and Structures
5. Prograde and retrograde metamorphism, Metasomatism
6. Metamorphic facies

### **Unit – V: Metamorphic Petrology**

1. Phase diagrams and graphic representation of mineral assemblages
2. Metamorphic reactions, elemental exchange and P-T conditions of isograds.
3. Plate tectonics and metamorphic processes.
4. Paired metamorphic belts, Archaean and Proterozoic terrains.
5. Pressure-temperature time paths in regional metamorphic rocks, Polymetamorphism

#### **Books Recommended**

## **GS-202: PHYSICS AND CHEMISTRY OF THE EARTH**

### **Unit – I: Universe and Planetary System**

1. Origin and components of solar system
2. Meteorites and their classification
3. Earth in relation to the solar system and universe
4. Cosmic Abundances of elements
5. Composition of the planets and meteorites

### **Unit – II: Physics of the Earth**

1. Seismic waves and their velocities
2. Internal structure of the earth,
3. Density distribution, shape and mass of the earth. density Vs depth profile.
4. Gravity and gravitational mechanics, gravity anomalies and their interpretation
5. The earth as Magnet, Earth's magnetic field, changes in magnetic field, origin of geomagnetic field, palaeomagnetism.

### **Unit – III: Introduction to Geochemistry**

1. Introduction to Geochemistry – its scope, Geochemical Classification of the elements
2. Geochemical Cycle, path finder Elements, threshold values and Mode of Occurrence.
3. Geochemical classification and distribution of elements in the earth
4. Structure and atomic properties of elements
5. The Periodic table
6. Laws of Thermodynamics and phase diagrams
7. Geochemistry of hydrosphere, biosphere and atmosphere
8. Elementary crystal chemistry and thermodynamics
9. Structure Composition and evolution of the earth and distribution of elements.

### **Unit – IV: Geochronology and age of the Earth**

1. Law of Radioactivity,
2. Principles of isotopic dating, Decay schemes and Derivation of equation of age.
3. Introduction to isotope geochemistry
4. Rb/Sr, U-Th-Pb methods of dating the rocks.
5. Age of the Earth.
6. Trace elements

## **Unit – V: Geochemical Methods**

1. Geochemical methods – Geochemical Anomalies – Dispersion patterns – Geobotanical indicators of minerals – surface and subsurface methods of sampling.
2. Geological Principles of ore search – Introduction to Assaying and valuation of mineral deposits

### **Books Recommended**

## **GS-203: GEOMORPHOLOGY, STRUCTURAL GEOLOGY AND TECTONICS**

### **Unit – I: Introduction to Geomorphology**

1. Introduction to Geomorphology : History, basic concepts type and tools
2. Landforms : Role of lithology, climate and tectonics
3. Denudational processes - weathering, erosion, transportation, weathering products and soils - profiles, types, duricrusts
4. Hillslopes : Their characteristics and development, fluvial processes on hill slopes
5. River and Drainage basin : Drainage patterns, network characteristics, Valleys and their development. Process of river erosion, transportation and deposition

### **Unit – II: Geomorphic Landforms and Applied Geomorphology**

1. Landforms produced by geomorphic agents
  - a) Fluvial b) Coastal c) Aeolian, d) Glacial, e) Karst, and Desert landforms
2. Applied Geomorphology : Application of geomorphology in geohydrology, mineral prospecting, engineering geology, watershed management, urban planning and environmental studies
3. Geomorphology of India : Geomorphological features and zones
4. Geomorphic mapping
5. Slope analysis and drainage basin analysis
6. Physiographic zones of Maharashtra
7. Topographical maps

### **Unit – III: Introduction to Structural Geology**

1. Principles of geological mapping and map reading
2. projection diagrams
3. Mechanical principles of rock deformation,
4. Behaviour of rock material under stress, strain analysis
5. Classification and genesis of folds, faults, lineations, foliations, joints and fractures

### **Unit – IV: Structural Analysis**

1. Scope of structural analysis , concept of Tectonite fabric and Tectonite Symmetry
2. Structural analysis on microscopic, mesoscopic and macrosopic scales
3. Introduction to petrofabrics
4. Structural behavior of igneous rocks, diapirs and salt domes diapirs and salt domes

## **Unit – V: Tectonics**

1. Structure and physical characters of continental and oceanic crust
2. seismic belts of the earth
3. Continental drift – geological and geophysical evidence, mechanics, objections, present status
4. Sea - floor spreading and Plate Tectonics, Structure and Tectonics of divergent margins, transform faults, convergent margins
5. Geodynamics of the Indian Plate and Tectonic framework of India
6. Heterogeneity of the earth's crust
7. seismicity and Plate movements
8. Neotectonics - Features and evidences-characteristic landforms, Methods of analysis
9. Orogeny and epeirogency
10. Isostasy
11. Gravity and magnetic anomalies at Mid-ocean ridges, deep sea trenches, continental shield areas and mountain chains, , Island arcs, Oceanic islands and volcanic arcs,

### **GS-204: PRACTICALS RELATED TO IGNEOUS AND METAMORPHIC PETROLOGY**

1. Characterisation of Igneous rocks, textures and structures.
2. Characterisation of different rock types under microscope.
3. Igneous rocks and Metamorphic rocks
4. CIPW normative calculation for igneous rocks.
5. Variation diagrams (Binary and Ternary)

### **GS-205: PRACTICALS RELATED TO GEOMORPHOLOGY, STRUCTURAL AND TECTONICS**

1. Structural problems by orthographic and stereographic methods.
2. Construction of structural sections and interpretation of geological maps.
3. Plotting and interpretation of mesoscopic structural data
4. Drainage basin and network morphometry
5. Relief and slope analysis - Profiles and maps
6. Identification of landforms on toposheets, aerial photographs and satellite images
7. Study of representative soil profiles

## SEMESTER – III

### GS-301: INDIAN STRATIGRAPHY

#### **Precambrian Stratigraphy of India –Part 1- Archaean**

##### **Precambrian stratigraphic framework of India**

- Classification, structure and tectonics of the Dharwarcraton
- Ancient Supracrustal (Sargur Type)
- Gold bearing schist belts of Eastern Karnataka (Kolar Type)
- Younger Schist belts (Dharwar Type)
- Granulites, charnockites, Khondolites of eastern ghats
- Structure, tectonics and stratigraphy of the OMG, OMTG, Iron Ore Group (SingbhumCraton)
- Stratigraphy of the Sukma, Bengpal, and Bailadila series from Central India
- Stratigraphy of BGC /Bhilwara Super Group of Rajasthan
- Ancient granites, viz. Singbhum, Chitradurga, etc.
- Archaean of the Extra Peninsular region

#### **Precambrian stratigraphy of India-Part 2- Proterozoic**

##### Archaean-Proterozoic boundary

- Stratigraphy, geology, tectonics and evolution of the following Proterozoic basins / Purana formations in India
  - Delhi-AravalliSupergroup
  - Singbhum Group
  - Sausar-Sakoli Groups
  - Vindhyaans
  - Cuddapah
  - Pranhita-Godavari
  - Bhima
  - Kaladgi

#### **Phanerozoic stratigraphy of the Extra peninsular region**

Paleozoic stratigraphy of Himalayan sequences from Kashmir, Spiti, Kumaon region, Cambrian of Spiti, Triassic of Spiti, Triassic of Pin valley

- Geology of the Indus Ophiolite belt, the Indus Group and Sangeluma Group
- Geology of the ShyokOphiolite belt
- The Trans-Himalayan & Karakoram granite batholith
- Statigraphy and tectonics of the Siwaliks

## **GS-302: INDIAN MINERAL DEPOSITS, EXPLORATION AND MINING**

### **Indian mineral deposits and mineral economies:**

- Occurrence and distribution in India of metalliferous deposits – base metals, iron, manganese, aluminum, chromium, nickel, gold, silver, molybdenum, Indian deposits of non-metals – mica, asbestos, barites, gypsum, graphite, apatite and beryl, Gemstones, refractory minerals, abrasives and minerals used in glass, fertilizer, paint, ceramic and cement industries, Building stones, Phosphorite deposits, Placer deposits, rare earth minerals.
- Coal deposits: Classification, genesis and distribution of coal fields in India
- Strategic, critical and essential minerals,
- India's status in mineral production changing patterns of minerals consumption, National Mineral Policy,
- Mineral Concession Rules, Marine mineral resources and Law of sea.

### **Ore genesis:**

- Ore deposits and ore minerals Magmatic processes of mineralization.
- Porphyry, Skarn and hydrothermal mineralization.
- Fluid inclusion studies.
- Mineralization associated with – (i) Ultramafic, mafic and acidic rocks. (ii) Greenstone belts. (iii) Komatites, Anorthostics and Kimberlites and (iv) submarine volcanism,
- Magma-related mineralization through geological time.
- Stratiform and Stratabound ores,
- Ores and metamorphism- cause and effect relations.

### **Mineral exploration:**

- Methods of surface and subsurface exploration,
- prospecting for economic minerals – drilling, sampling and assaying,
- Geophysical techniques – gravity, electrical, magnetic, airborne and seismic,
- Geomorphological and remote sensing techniques,
- Geobotanical and geochemical methods,
- Borehole logging and surveys for deviation.

### **Mining:**

- Guides to ore: Regional and Topographical Guides, Mineralogical Guides, Structural Guides and Stratigraphic Guides
- Drilling Methods: Percussion Drills – Jumper bar drills- Pneumatic drills - Churn drills-Reichdrills, Rotary Drills -Auger drills -Collyer drills-Turbo drills- Diamond drills, Miscellaneous Drills - Jet drills-High temp. flame drills- Banka drills (Empire drills)- Burnside drills
- Mining Methods - Alluvial Mining- Open Cast Mining - Under ground Mining

## Books and references

1. Geochemistry In Mineral Exploration Awakes, H & Wobb J.S. Harper & Row New York.
2. Principles Of Geochemical Prospecting, Ginsburg. I.I. Pentagon Press, N.Y. london.
3. Geochemistry Of Rare And Dispersed Chemical Elements In Society, Vinogradev.
4. Biochemical Methods Of Prospecting, Malyuga, D.P.
5. Geochemistry Of Epigenesis - Faibidge.
6. Principles of Mining Geology, Arcokiaswamy..
7. Introduction To Geophysical Prospecting - Milton B, DobrinMc-Graw Hill Book Company, Inc
8. Exploraion Geophysics - Jakaosku, J.J.
9. Outlines Of Geophysical Prospecting - A manual for Geologists. M.B.R. Rao. Prasaranga, Mysore University
10. Geophysical Methods in Geology - P.V. Sharma.

21. The Ore Minerals And Their Intergrowths - Ramhor, Dr. Paul.
22. Ore Petrology - Stanton, R.L.
23. India's Mineral Resources - Krishnaswamy, S.
24. Metallic and Industrial minerals - Lamey Carl, A.
25. Introduction To India's Economic Minerals - Sharma, N.L. & Ram. K. S.
26. A Treatise On Industrial Minerals Of India-Sinha, R.L.
27. **Mineral Deposits Of India, Mukerjee 1999: Allied publications.**
28. Elements of Mining Geology, Young
29. Elements of Mining - Lewis
30. Mining Of Mineral Deposits – Shevyekov
31. Introduction Of Mining - Stoces

## **GS-303: REMOTE SENSING AND GIS**

### **Fundamentals of Remote Sensing**

Concepts and principles of Remote Sensing

The nature and generation of EMR

Interaction of EMR with the atmosphere and earth's surface features.

### **Satellite Remote Sensing:**

Satellite Remote Sensing – Data products and their specifications

Remote Sensing observations and platforms

Types of sensors, Data Resolution

Global and Indian Space missions

### **Digital Image Processing and Image Interpretation**

Digital Image Structure and Data recording formats

Image rectification and restoration

Image enhancement and classification

Image transformation and data fusion

Ground truths and training sets in image processing and in automated processing

Visual photo interpretation techniques based on 'photo elements' and 'terrain elements'

### **Geographic Information Systems (GIS) and GPS**

Principles and applications of GIS

Map Projections Systems, Map Visualization

Traditional maps, map scales and their interpretation

Components of GIS

GIS data models and structures

GIS analysis and GIS modeling

Integration of Remote sensing and GIS techniques and its applications in Geological Sciences

Principles and applications of GPS

### **Computer Applications**

Basic concepts of computer, hardware, operating systems

Application software in Geology: word processing, spreadsheets, graphics and data base,

## **GS-304 PRACTICALS RELATED TO INDIAN MINERAL DEPOSITS, EXPLORATION AND MINING**

- Delineation of ore deposit based on exploration data.
- Economic evaluation of ore deposit.
- Preparation of technical report.
- Geochemical map interpretation, Interpretation of anomalies groundwater and river water, Selection of geochemical methods in mineral exploration.
- Interpretation of field geophysical data gravity, magnetic, electrical, seismic and radio active in deciphering groundwater, mineralized zones and construction site evaluation.
- Study of metallic and non- metallic economic minerals.

## **GS-305: PRACTICALS RELATED TO REMOTE SENSING AND GIS**

Determination of photo scale,

Study of traditional maps

Visual interpretation of earth's features from aerial photographs and satellite images

Stereo-photo interpretation

Photogrammetric computation

Preparation of different thematic maps in GIS

Operation of GPS

Drawing flow charts for the computer programs required in solving Geoscientific problems

### **Books and references:**

1. Aerial photographic interpretation, Principles and applications - D.R.Leuder.
2. Photogeology - Miller, J.C.
3. Manual of colour aerial photography -Ed. Smith, J.T.Jr.
4. Manual of photogrammetry - Ed: MorrieM.Thompson.
5. Manual of Remote sensing - Ed: Robert G Reeves.
6. Theory of pattern recognition and modern forecasting - V.Karpin and Wright Pattern.
7. Remote sensing in Geology - Parry S. Siegal& Alan. R.Gillespie
8. Manual of photographic interpretation - Ed: Colwell, R.N.
9. Principles of Remote Sensing - Patel Singh; SP publication
10. Digital Remote Sensing - Pritivish Nag M Kudrat ; Concept publication
- 11. Principles of GIS for land and resources assessment, Burrough, P.A., 1986, Oxford.**
12. An introduction to Geographical information systems: Ian Heywood, Sarah Cornelius and Steve Carver.Publisher: Longman.
13. Geographical information systems Vol 1 & 2. Edited by: Paul A.Longley, Michael F.Goodchild, David J. Maguire & David W.Rhind.
14. **Geographical information systems and digital image processing – Muralikrishna 1999. Allied Publication**

## SEMESTER – IV

### GS-401: PETROLEUM GEOSCIENCES

#### **Composition of Reservoir and Source rocks**

- Composition of hydrocarbons & non hydrocarbons component
- Physico-chemical properties of hydrocarbons (oil, gas, oil field waters, Coal bed methane, hydrates)
- Surface & subsurface occurrences of hydrocarbons
- Theories of Organic & inorganic Origin of hydrocarbons: Merits & Demerits  
Organic petroleum geochemistry and conversion of organic matter into hydrocarbons
- Kerogen : Composition, classification and types
- Source & reservoir rocks (porosity & permeability); petroliferous basins

#### **Total Petroleum Systems**

- Migration-Primary & Secondary, characteristics & processes
- Accumulation: Favorable & unfavorable conditions; nature of accumulation
- Clastic & non clastic Reservoirs rocks
- Traps: introduction, conditions of formation and Types

#### **Distribution of Reservoir fluids and Oil Field Waters**

- Introduction to Oil-Water, Gas-Oil Contacts
- Fluid flow within Reservoirs

#### **Exploration & Logging**

- Introduction to Geophysical, Geo-bio-chemical and Geobotanical prospecting
- Logging: Introduction, Types & Interpretation.
- Seismic methods: Principles, techniques, tools and interpretation
- Electrical logs: Principles, techniques, tools and interpretation
- Gamma ray & neutron logs: Principles, techniques, tools and interpretation

#### **Development of Hydrocarbon deposits**

- Development of mature oil-gas fields: Objectives, stages, processes and execution;
- Enhance Oil Recovery (EOR): Primary, Secondary & Tertiary

#### **Drilling Techniques**

- Introduction to Drilling methods, Rigs and their types,
- Component of Rigs & Drilling Mechanism.
- Drilling and mud parameters

#### **Petroliferous basins-**

- World scenario and at least one case study of economically important Hydrocarbon deposits;
- Petroliferous basins of India: Stratigraphy, lithology, structure and reserve estimation of – Bombay high, Krishna Godavari, Assam, Cambay and Jaisalmer Basins

## **GS-402: HYDROGEOLOGY**

### **Introduction**

- Hydrosphere – Evaporation, condensation, precipitation, interception, runoff cycle (surface, subsurface and groundwater), infiltration.
- Factors that affect occurrence of groundwater – Climate, topography, geology and hydrogeologic properties of rocks.
- Hydrogeological classification of rocks
- Constraints of water resources

### **Occurrence and distribution of Groundwater**

- Vertical distribution of groundwater.
- Hydrologic properties of Rocks – Porosity, Hydraulic conductivity
- Derivation and validation of Darcy's Law.
- Aquifers – Characteristics of unconfined and confined aquifers
- Behaviour of alluvium, sedimentary, crystalline and volcanic rocks as aquifers
- Flow net analysis
- Types of well

### **Pumping tests**

- Pumping tests – principles – types of pumping tests, procedures, determination of aquifer properties and well characteristics by simple graphical methods.
- Significance of transmissivity, storativity and specific capacity of wells.

### **Groundwater quality**

- Quality of groundwater – chemical standards for drinking and irrigational water- concept of hydrogeochemical facies
- Seawater intrusion – Ghyben Herzberg relation – remedial measures

### **Exploration techniques**

- Integrated approach to groundwater prospecting: Role of toposheets and remote sensing in groundwater exploration
- Hydrogeomorphological mapping
- Surface and subsurface Geophysical methods,
- Tracer techniques Exploratory Borewell programme

### **Watershed Development and management**

- Introduction to Watershed development : Artificial recharge techniques, surface water harvesting techniques.
- Conjunctive use of surface and groundwater.
- Groundwater provinces of India.
- Groundwater in Maharashtra state.
- Groundwater legislation

## **GS-403: ENGINEERING AND ENVIRONMENTAL GEOSCIENCES**

### **Introduction to Engineering Geology**

- Scope of Engineering Geology
- Engineering properties of rocks and soils; and their determination.
- Rock mechanics: Behavior of rocks under stress, Rock failure mechanisms
- Geological considerations for the selection of dam sites, Spillways, tunnels and Bridges

### **Geo-material**

- Building stones and road metals; Aggregates and its classification
- Rock testing: Mechanical test, Chemical test, Durability test
- Aggregate resource development:
  1. Requirement of primary fragmentation
  2. Planning of quarry, hill slope side or open pit.
  3. Removal of overburden and its disposition at suitable site
  4. Selection of drilling, blasting method for main blasting and secondary breaking for given size of fragmentation
  5. Selection of equipment's for drilling, loading, hauling to crusher site
  6. Methods of extraction of aggregate resources
  7. Use of synthetic materials used as remedial measures
  8. Estimation of overburden thickness & rock strata classification

### **Introduction to Environmental Geology:**

- Introduction, Fundamental concepts, scope. Man and environment.
- Natural and Man- made hazards and disasters
  - Lithospheric hazards- volcanoes, earth quakes, landslides, land subsidence, tsunamis, meteorite strike, etc.
  - Hydrospheric hazards- sea level changes, coastal hazards, water pollution (sea, river and ground water), floods
  - Atmospheric hazards- air pollution, acid rain, etc
  - Man-made hazards- industrial, nuclear, mining, etc

### **Remedial measures:**

- Introduction: origin, characteristics and preventive measures- water pollution, soil pollution and air pollution.
- EIA (Environmental Impact Assessment), case studies.

### **Introduction to marine Geology**

- Introduction and significance of Physical, Chemical and Biological oceanography

### **Marine resources**

- Shallow and deep water Marine Resources and significance: E.g. Polymetallic nodules and oozes
- Tidal Energy: Introduction and harnessing
- Marine pollution: Oil spills and nuclear waste disposal

#### **GS-404: PRACTICALS RELATED TO ABOVE COURSES**

- Lithofacies analysis
- Preparation of structure contour maps and structural cross sections
- Porosity and permeability measurements
- Well correlations: geologic and bio-stratigraphic
- Well log interpretations
- Isopach and lithofacies maps, Fence diagram
- Oil Reserve Estimation
- Core analysis
- Analysis of rainfall data
- Preparation of water level contour maps and their interpretation
- Analysis of pumping test data using different methods of aquifer and well characteristics determination.
- Plotting and analysis of hydrogeochemical data
- Morphometric analysis and site selection for water conservative measures.
- Water audit.
  
- Various methods of Surveying used in engineering geology, Chain Surveys, Plane table surveys, Use of Surveying equipments
- Determination of Engineering properties of Geological materials
- Interpretation of borehole data, Preparation of bore logs / Lithologs.
- Preparation of Report and Presentation of Engineering data
- Water and Soil analysis, Plotting and interpretation of geochemical data.
- Preparation of hazard Zonation map.
- Quantification of EIA.
- Heavy Mineral: Separation, identification and interpretation
- Sediment Size and shape Analysis and interpretation
- Trace element Analysis
- Organic Carbon and Total Phosphorus Analysis
- Foraminiferal and nano-planktons studies

#### **GS-405: DISSERTATION**

Topic of the Dissertation work will be allotted to the students as per the specialization of the teacher and interest of the student.

## **Books and references**

1. Todd, D.K. – Groundwater Hydrology
2. Karanth K.R. – Groundwater Assessment Development and Management
3. Raghunath H.M. – Groundwater
4. Davis S.n. and Dewiest R.J.M. – Hydrogeology
5. Freeze and Cherry – Groundwater
6. Levenson : Geology of Petroleum
7. Russel : Petroleum Geology
8. Brown and Day : India's Mineral Wealth
9. Dobrin : Introduction to geophysical prospecting
10. Kearey and Brooks: An Introduction to Geophysical Exploration
11. Soroie: Geology for Engineers
12. Krynine and Judd: Principles of Engineering Geology and Geotechniques
13. Rise and Wateson: Elements of Engineering Geology
14. Faure : Principles of Isotope Geology
15. Panigrahi D.C. : Mine Environment and Ventilation

Books on Disaster Management course of IGNOU

**SCHOOL OF ENVIRONMENTAL AND EARTH SCIENCES**  
**North Maharashtra University, Jalgaon**

**Model for implementation of the**

**Credit-Grade based Performance and Assessment (CGPA) system**

**M.Sc. course**

In tune with the concept and suggestions of the UGC and NAAC, technological advancement and social needs and to make the teaching effective and meaningful, School of Environmental and Earth Sciences has been permitted to adopt Credit-Grade based Performance and Assessment (CGPA) system from the academic year 2009-2010 for the course M.Sc. (Applied Geology) being run in the school. The modalities and operational details of the credit system shall be as follows.

**A. Features of the CGPA System:**

1. Master's degree course, M.Sc. being run in School would be of 84 credits each.
2. One credit for the theory course shall be of the one clock hour per week running for 15 weeks. Thus, each theory course of 4 h per week teaching shall be of 4 credits.
3. Four credits for each practical course shall be awarded to the 8 h of laboratory exercise per week for a semester. As per the guidelines of the work load, each batch for practical course shall consist of 10-12 students and each batch shall perform the laboratory exercise twice in a week. Thus, each practical course shall be of 8 h laboratory exercise per week with 4 credits.
4. Four credits shall be awarded to the Project course, which will commence from III Semester and the final work and report will be completed during IV Semester. The marks and the credits will be allotted in IV Semester.
5. Two credits, one each in first two semesters (i.e. for Semester I and II) have been allocated for the Tutorials/Home assignments. Besides, for every theory course one Take Home Assignments of 25 marks each shall be conducted. Average marks of all the home assignment in the given semester will be considered. No grade will be given for the tutorial. However, the completion of the credit for the tutorial shall be compulsory.
6. Two credits, one each in the III and IV semesters have been allocated for the Seminar. There shall be one seminar per student. Marks out of 25 will be allocated per semester for this as per break up given below in (g). No grade will be given for the seminar. However, the completion of the credit for the seminar shall be compulsory.
7. Every student shall complete 84 credits in a minimum of four semesters. All Semesters will have 21 credits each.
8. Academic calendar showing dates of commencement and end of teaching, internal assessment tests and term end examination shall be duly notified before commencement of each semester every year by the School.

**B. Evaluation of the student:**

(a) The evaluation of the student shall be divided into two parts viz. **Internal Assessment** and **Term End Examination (semester end examination)** with a weightage in the ratio of 25:75, as approved by the committee.

(b) Standard of passing –

(i) There shall not be pass or fail for the internal assessment. However, the attendance for the internal assessment shall be compulsory.

(ii) Minimum marks for passing the Term End Examination in theory/practical/project course shall be 40%.

(iii) Minimum marks for passing the theory/practical/project course ( i.e. sum of the marks obtained in internal and term end examination) shall be 40%.

(c) The distribution of marks for each theory paper of 4 credits at term (Semester) end examination and for continuous internal assessment (Minor tests), as approved by the committee shall be as follows:

<b>Theory Examination</b>	<b>Maximum marks</b>
Internal assessment	25
Term end examination	75
Total marks	100

(d) The distribution of marks for each laboratory course of 4 credits at term (Semester) end examination and for continuous internal assessment (Minor tests), as approved by the committee shall be as follows:

<b>Practical Examination</b>	<b>Maximum marks</b>
Internal assessment	25
Term end examination	75
Total marks	100

(e) The Project course will commence from III Semester and the final work and report will be completed during IV Semester. The marks and the credits will be allotted in IV Semester. The distribution of marks for Project course of 4 credits at term (Semester) end examination and for continuous internal assessment (Minor tests), as approved by the committee shall be as follows:

<b>Practical Examination</b>	<b>Maximum marks</b>
Internal assessment	25
Term end examination	75
Total marks	100

(f) **Internal Assessment:**

(i) Internal assessment for each course would be continuous and dates for each internal test/practical test will be pre-notified in the time table for teaching or placed separately as a part of time table.

	<b>Heads</b>	<b>Marks</b>	<b>Evaluating Authority</b>
(ii)	Marks for journal	05	Concerned practical incharge
	Experimental work carried by student	15	
	Viva-voce	05	
	Total marks	25	

Each subject teacher shall coordinate this activity and maintain the record of the internal tests conducted.

- (iii) Internal assessment for each course shall be of 25 marks.
- (iv) There shall not be pass or fail for the internal assessment. However, the attendance for the internal assessment shall be compulsory.

#### **For Theory Courses:**

- (i) Two internal tests for each theory course comprising of 4 credits shall be conducted by the subject teacher.
- (ii) Each test shall be of 25 marks.
- (iii) The marks for each test shall be displayed on notice board within seven days of conducting the test.
- (iv) It is mandatory to show the answer sheets of all tests to the students.

#### **For Practical Courses:**

The internal assessment for the practical courses will be based on the following 03 heads:

#### **For Project course**

- (i) The Project course will commence from III Semester and the final work and report will be completed during IV Semester.
- (ii) Every student has to undertake a project of interest. The project may be related to a theoretical analysis, an experimental investigation, a prototype design, a new correlation and analysis of data, fabrication and setup new equipment. Ordinarily, the Project Co-ordinator shall be chosen by the student depending on his/her subject interest. The project co-ordinator assigns the topic for the project and the work is done uniformly during both the semesters of the final year.
- (iii) The marks and the credits will be allotted in IV Semester.
- (iv) On the basis of marks obtained in Seminar, the marks out of 25 will be given for the Seminar.

	<b>Heads</b>	<b>Marks</b>	<b>Evaluating Authority</b>
	Performance of the student in the collection of reference material for project work and punctuality	05	Concerned Project guide
	Experimental work carried out by the student	15	
	Viva-voce	05	
	Total marks	25	

**For Tutorial:**

- (i) Two credits based on Tutorial component, one each in I and II semesters will constitute the compulsory part.
- (ii) For every theory course one Take Home Assignments of 25 marks each shall be given.
- (iii) The evaluation will be based on following two heads:

Head	Marks	Evaluating Authority
Take Home Assignment	25	Concerned subject teacher

- (iv) On the basis of marks in Tutorials for theory courses, the average will be calculated and the marks out of 25 shall be awarded for the Tutorial.

**For Seminar:**

- (i) Two credits based on Seminar component, one each in the III and IV semesters will constitute the compulsory part.
- (ii) Each student shall deliver one seminar per semester and there will be a continuous evaluation of the seminar.
- (iii) The evaluation will be based on following four heads:

Heads	Marks	Evaluating Authority
collection of reference material for seminar	05	Concerned course teacher
Content of the seminar	15	
Performance in seminar/presentation	05	
Total marks	25	

- iv) On the basis of marks obtained in Seminar, the marks out of 25 will be given for the Seminar.

**g) Term end examination:**

- (i) The term end examination for 75 marks per course would be held about a week after completion of teaching for the semester.
- (ii) The term end examination of maximum marks 75 and its assessment work shall be conducted by the School from the academic year 2009-10 under the academic flexibility granted to the School by the University.

**For Theory Courses:**

- (i) The pattern of the question paper for the academic year 2009-2010 remains same as at present.
- (ii) Each theory paper of 75 marks shall be of the three hours duration.

**For Practical Courses:**

- (i) The term end practical examination shall be of 75 marks and it is of duration 06 h.
- (ii) There shall be two examiners for the practical examination out of which one examiner shall be from the other University/Institute.

**For Project course:**

- (i) The project report should be submitted by the prescribed date. Submission of the project cannot be postponed beyond the date specified in the calendar.

- (ii) Students should submit 2 bound typed copies of Project Report to the department. A student who is unable to complete his/her Project may be awarded 'X' grade and he/she will be required to register for the next Semester and pay the fees under following circumstances:  
 Exceptional circumstances beyond students / supervisor control  
 Medical grounds
- (iii) There shall be two examiners for the evaluation of Project, out of which one examiner shall be from the other University/Institute.
- (iv) The examiners shall evaluate the report and an oral examination shall be conducted. The assessment of the project work is done on the following basis-

Heads	Marks	Evaluating Authority
Performance of the student in the presentation of the project work and report	10	Panel of examiners
Experimental work carried out by the student	50	
Viva-voce	15	
Total marks	75	

### C. Grades:

- (i) Marks for each course would be converted to grades as shown in Table 1.  
 Table 1: Conversion of marks to grades in credit system

Marks obtained	Grade	Grade Points
90-100	A+	10
80-89	A	9
70-79	B+	8
60-69	B	7
55-59	C+	6
45-54	C	5
40-44	D	4
39 and less	F	0

- (ii) The grade point will be given on the total marks (sum of mark obtained in internal assessment and term end examination) obtained in the said subject.
- (iii) A student who fails in a course (i.e. He scores less than 30 out of 75 marks in the Term End Examination or less than 40 out 100 marks) shall be given F grade. Student with F grade in course would be granted credit for that course but not the grade for that course and shall have to clear the concerned course within 1.5 year from appearing for first time in the concerned paper.
- (v) The **total grade points earned in each course** shall be calculated as –  
*Grade points obtained (vide Table-1) X Credits for the course*

Maximum grade points that can be earned in a semester are 200.

(vi) **Semester Grade Point Average (SGPA) –**

The performance of a student in a semester is indicated by a number called SGPA. SGPA is the weighted average of the grade points obtained in all courses registered by the student during the semester. It shall be calculated as follows-

$$SGPA = \frac{\sum_{i=1}^n C_i p_i}{\sum_{i=1}^n C_i}$$

where  $C_i$  = the number of credits earned in the  $i$ 'th course of a semester for which SGPA is to be calculated (**Audit credits should not be included**).

$p_i$  = grade point earned in the  $i$ 'th course

$i = 1, 2, 3, \dots, n$  represent the number of courses in which a student is registered in the concerned semester.

That is,

$$SGPA = \frac{\text{Total earned grade points for the semester}}{\text{Total credits for the semester}}$$

The SGPA is rounded upto one decimal places.

(vii) **Final result** – Up to date assessment of the overall performance of a student from the time of his/her first registration is obtained by calculating a number called Cumulative Grade Point Average (CGPA), which is weighted average of the grade points obtained in all courses registered by the student since he/she entered the School/Department.

$$CGPA = \frac{\sum_{j=1}^m C_j p_j}{\sum_{j=1}^m C_j}$$

where  $C_j$  = the number of credits earned in the  $j$ th course up to the semester for which CGPA is to be calculated

$p_j$  = grade point earned in the  $j$ th course. A letter grade lower than D (i.e. grade point < 4) in a course shall not be taken into consideration for the calculation of CGPA.

$j = 1, 2, 3, \dots, m$  represent the number of courses in which a student is registered up to the semester for which the CGPA is to be calculated.

The CGPA is rounded upto one decimal places.

(viii) The final grade earned shall be as per Table 2 given below-

**Table-2**

<b>CGPA</b>	<b>Grade</b>
8.0-10	A+
<b>7.0-7.9</b>	A
<b>6.0-6.9</b>	B+
<b>5.5-5.9</b>	B
<b>4.5-5.4</b>	C+
<b>4.0-4.4</b>	C
<b>0 -3.9</b>	F
